

**Strategy Overview** As of 3/31/24

Dynamic Income is designed to generate income while managing principal risk. The strategy invests in a diversified basket of global ETFs across the income spectrum: U.S. bonds, international bonds, corporate bonds, mortgages, and U.S. and international dividend equities. Seeking a target yield of inflation +2-3%, protecting against rising interest rates and inflation with real assets, potential for appreciation through growth assets, and downside protection through an allocation to yield sources with diversification benefits.

**Active Management for a Changing Market**

- People are living longer, and the road to financial security is only getting more complex. Investors require thoughtful solutions that properly balance the **financial tradeoff between income production and principal risk**.
- The rise of the Exchange Traded Fund (ETF) marketplace has provided NorthCoast with one of the tools necessary to deliver investment products designed to manage this tradeoff. Utilizing a variety of ETFs, NorthCoast can provide investors with **increased transparency, lower costs, and greater consistency**.
- Market exposure adjustments, rules-based ETF selection, and disciplined risk management are the key components to Tactical Income. Incorporating a hands-on tactical asset allocation solution can **enhance diversification, lower volatility, and generate solid, long-term income**.

**Investment Process**

Focus on income generation while managing principal risk through the implementation of a systematic 3-step process
